Tools	JIRA, Azure DevOps, GitHub, Miro, Claude, Cursor, PowerBI, Lovable, n8n, OpenAI, Google Analytics
Soft Skills	User Empathy, Stakeholder Management, Cross-functional Leadership (teams up to 10), Analytical Thinking

WORK EXPERIENCE

Product Manager – AI | PwC

03.2026 – present

- Leading AI product initiatives within a global consulting environment, driving end-to-end delivery of AI-enabled solutions for enterprise clients.
- **AI Product Delivery:** End-to-end product development of AI solutions leveraging LLMs, RAG architectures, and Agentic Workflows.
 - **Stakeholder Alignment:** Collaborating with diverse business and technical teams to define product vision, prioritize backlog, and align on delivery roadmap.

Product Owner – Global Data & AI | Novo Nordisk

03.2025 – 02.2026

- Led the product vision and development of an Attribute-Based Access Control (ABAC) solution, serving as a critical security enabler for the organization's global data platforms. Worked across multiple business domains with international stakeholders.
- **Security Compliance:** Operationalized a dynamic access control policy framework ensuring 100% compliance with internal and external regulations for enterprise data.
 - **Operational Efficiency:** Reduced time-to-data by 80% for business analysts and data scientists by automating access approvals, directly impacting drug development time-to-market.
 - **Scalable Architecture:** Delivered a centralized User Attribute Store enabling re-use of security policies across multiple business domains without redundant development.

Product Manager / Product Owner | 7N

06.2021 – 02.2025

- Took ownership of a strategic platform supporting core business operations. Managed the full product lifecycle for diverse user groups across international entities, working on integrations, new capabilities and internal processes.
- **User Engagement:** Achieved ~300% increase in average session time and boosted NPS by leading a user-centric platform redesign and launching new value-driven modules.
 - **Operational Efficiency:** Reduced support ticket resolution time by 60% via a new Admin Panel and accelerated recruitment CV processing by 40% through AI integration.
 - **Tech Modernization:** Managed migration from monolith to microservices and integrated a Headless CMS, significantly reducing technical debt and increasing business agility.

- **Strategic AI:** Launched an AI-driven matching tool integrated with CRM to support international expansion, directly aligning product capabilities with C-level growth strategies.

Product Owner – Automation Solutions | *Nordea Bank (via 7N)*

05.2019 – 05.2021

Managed a portfolio of intelligent automation products (RPA, Chatbots, OCR, APIs) to drive digital transformation.

- **€400k+ Annual Savings:** Delivered high-impact integration of RPA with OCR technology, automating document processing and directly reducing operational costs.
- **Innovation Pilot:** Launched a chatbot pilot consuming internal APIs, proving the business case for automated data gathering and triggering further investment in AI tools.
- **Security Integration:** Implemented CyberArk–BluePrism integration to address legal requirements and enable RPA for use cases with strict security requirements.

Senior Business Analyst | *ENERGA (via 7N)*

08.2018 – 03.2019

Key analyst for a critical electricity contracting application project, responsible for requirements engineering and process modeling.

- **Multi-Million Savings Potential:** Proactively identified and pitched a new energy demand forecasting concept, approved by directors for its potential to save millions annually.
- **Stakeholder Consensus:** Mapped complex processes and gathered requirements from directors across departments, creating a unified vision for the development team.

EARLIER EXPERIENCE

Business Analyst | *Arrow Electronics*

01.2018 – 07.2018

Unified disjointed business processes across French and German entities within Dynamics 365, enabling a standardized ERP rollout.

ERP Consultant | *Pomorska Grupa Informatyczna*

10.2015 – 12.2017

Led full lifecycle ERP implementation for four companies; acted as Lead Consultant for the CEE distributor of Lacoste & Gant.

Account Manager | *Comarch*

09.2013 – 08.2015

Achieved 80% YoY sales increase, closing the region's largest deal (>1M PLN) through effective consultative selling.

EDUCATION

2017 – 2018	Gdańsk University of Technology Postgraduate Studies, Business Analysis in IT Projects
2012 – 2013	France Business School in Amiens Erasmus – Management in International Business
2010 – 2014	Gdańsk University of Technology Master of Business Management
